This sound suppressor manual contains technical data controlled under the International Traffic in arm Regulations (ITAR). Export and/or release of technical data to foreign persons, entities, or governments, requires prior authorization from the United States Department of State. Title 22, CFR, Parts 120-130.

MODEL SL-338

WARNING!

Read the Operation and maintenance manual in its entirety before using suppressor. Failure to follow installation and maintenance instructions detailed in this manual can result in potential for serious injury to the user and damage to the weapon.

Verify Firearm is Unloaded

Visually and physically confirm your firearm is unloaded before attempting or performing any of the procedures in this manual. Failure to ensure the firearm is unloaded could result in unintentional discharge, causing injury or death.

Burn Warning: Allow suppressor to cool to ambient temperature before removal and/or service. The outside surface temperature of this suppressor may exceed 40 C/104 F. Therefore protective gloves should be worn at all times in attaching or detaching the suppressor. Failure to do so may result in severe burns to hands and any other unprotected skin surface.

Pinch Warning: Could be customized to the multi cal (as to changing out) but in attaching or detaching the can for all cans. The point of attachment and detachment is a pinch point and caution should be taken, including wearing protective gloves, to avoid severe injury at this pinch point.

Muzzle Warning: The muzzle of the firearm is different when a suppressor is attached. However, this is still the point where the projectile exits the weapon system and the muzzle should not cover or sweep any area the user is not will to shoot and kill.

Sonic Crack Warning: This suppressor will not protect end-users and those in close proximity from hearing damage when, and if, the projectile crosses the sound barrier. Thus, proper hearing (and eye protection) should be worn at all times.

.338 LAPUA MAGNUM

Advanced technology makes the powerful .338 Lapua Magnum a quiet, low recoil experience.

Magnum-sized Fun.

PRODUCT SPECIFICATIONS	Sound Reduction - 34 dB
	Length - 11.25"

"Export of this sound suppressor and/or sound suppressor manual is strictly prohibited without a valid export license issued by the United States Department of State, Office of Trade Controls, prohibited in the International Trade in Arms Regulation (ITAR), Title 22, CFR, Parts 120-130."

MOUNTING THE FLASH HIDER ON THE BARREL

1. First remove flash hider and crush washer (never use a crush washer when installing a Silent Legion bi-lock flash hider)
2. If flash hider lugs do not line up (vertical or horizontal) use shims to adjust
3. Degrease all threads and put two drops of Loctite 262 on each thread (barrel and flash hider)
4. Using torque wrench (set to 35 to 45 ft lbs), install flash hider

MOUNTING SUPPRESSOR ON FLASH HIDER

1. Place the base of the suppressor onto the QD tri-lock flash hider
2. Rotate the suppressor until the lugs on the QD tri-lock flash hider enter the base of the suppressor. This can occur in only one position.
3. Suppressor Lugs are different sizes to make sure that the unit repeats. Make sure the lugs are lined up with the correct pockets to install.

INSTALLING SUPPRESSOR ON BARREL

Make sure to check the bore of the suppressor to confirm that it is free of obstructions.

Note: The patented (patent number 8,210,087) Belleville spring washer system on the suppressor creates a pressure on the threads that will maintain the suppressors position on the weapon without unscrewing.

To Install: Screw the suppressor onto the threads until the spring pressure is felt. Then slowly tighten the unit until you feel it bottom out. The suppressor is now properly seated.

MAINTENANCE OF THE THREAD RETAINING SYSTEM

1. Unscrew the rear retainer from the suppressor
2. Remove Belleville spring washer
3. Clean face of the rear mount
4. Clean both faces of the Belleville spring washer
5. Install Belleville spring washer (Note: Be careful to have center dished section facing rear ward – this is critical!)
6. Screw rear retainer back on suppressor
7. Belleville spring washer is designed to free float and movement is not cause for concern

WARRANTY INFORMATION

Unconditional Lifetime Warranty. If for any reason you have an issue with a Silent Legion product, we will repair or replace it free of charge. Warranty does not apply if product is altered in any way.

Damaged Suppressor: This or any suppressor may not properly operate and create significant risk of injury or death if damaged or obstructed. Any and all such damage should be reported to an Armorer qualified and approved by Silent Legion, or it should be returned with the RA to Silent Legion.
